Skills

- Node Js
- React Js
- PostgreSQL
- PHP
- Critical Thinking
- Leadership
- Bootstrap

Projects

Laboratory Management System

"Developed a Laboratory Management System using **Node.js** for the backend, **React.js** for the frontend, and **PostgreSQL** as the database. Implemented different access levels for Super Admin, Admin, and User, ensuring secure and efficient data management. Super Admin and Admin functionalities include patient details management, report generation, user authorization, and appointment handling. Users can conveniently book appointments and access reports online, enhancing the overall efficiency and security of laboratory operations."

Task Crafter

"Designed a sleek Task Crafter app with HTML, CSS, and JavaScript, highlighting my front-end expertise. Boasting a modern interface, the project delivers an engaging task management experience. Explore the live demo in my portfolio!"

Education

KACHCHH UNIVERSITY

Bachelor of Computer Application
2020 - 2023
CGPA - **8.48**

DHARMSINH DESAI UNIVERSITY

Master of Computer Application
2023 - Present

Skills Summary

Design Process 78 %
Back End Development 81 %
